▲ HOW WE MEASURE

Capacity comes first. Results follow.

Two things are tracked separately, so a strong result cannot hide growing strain.

THE CAUSE

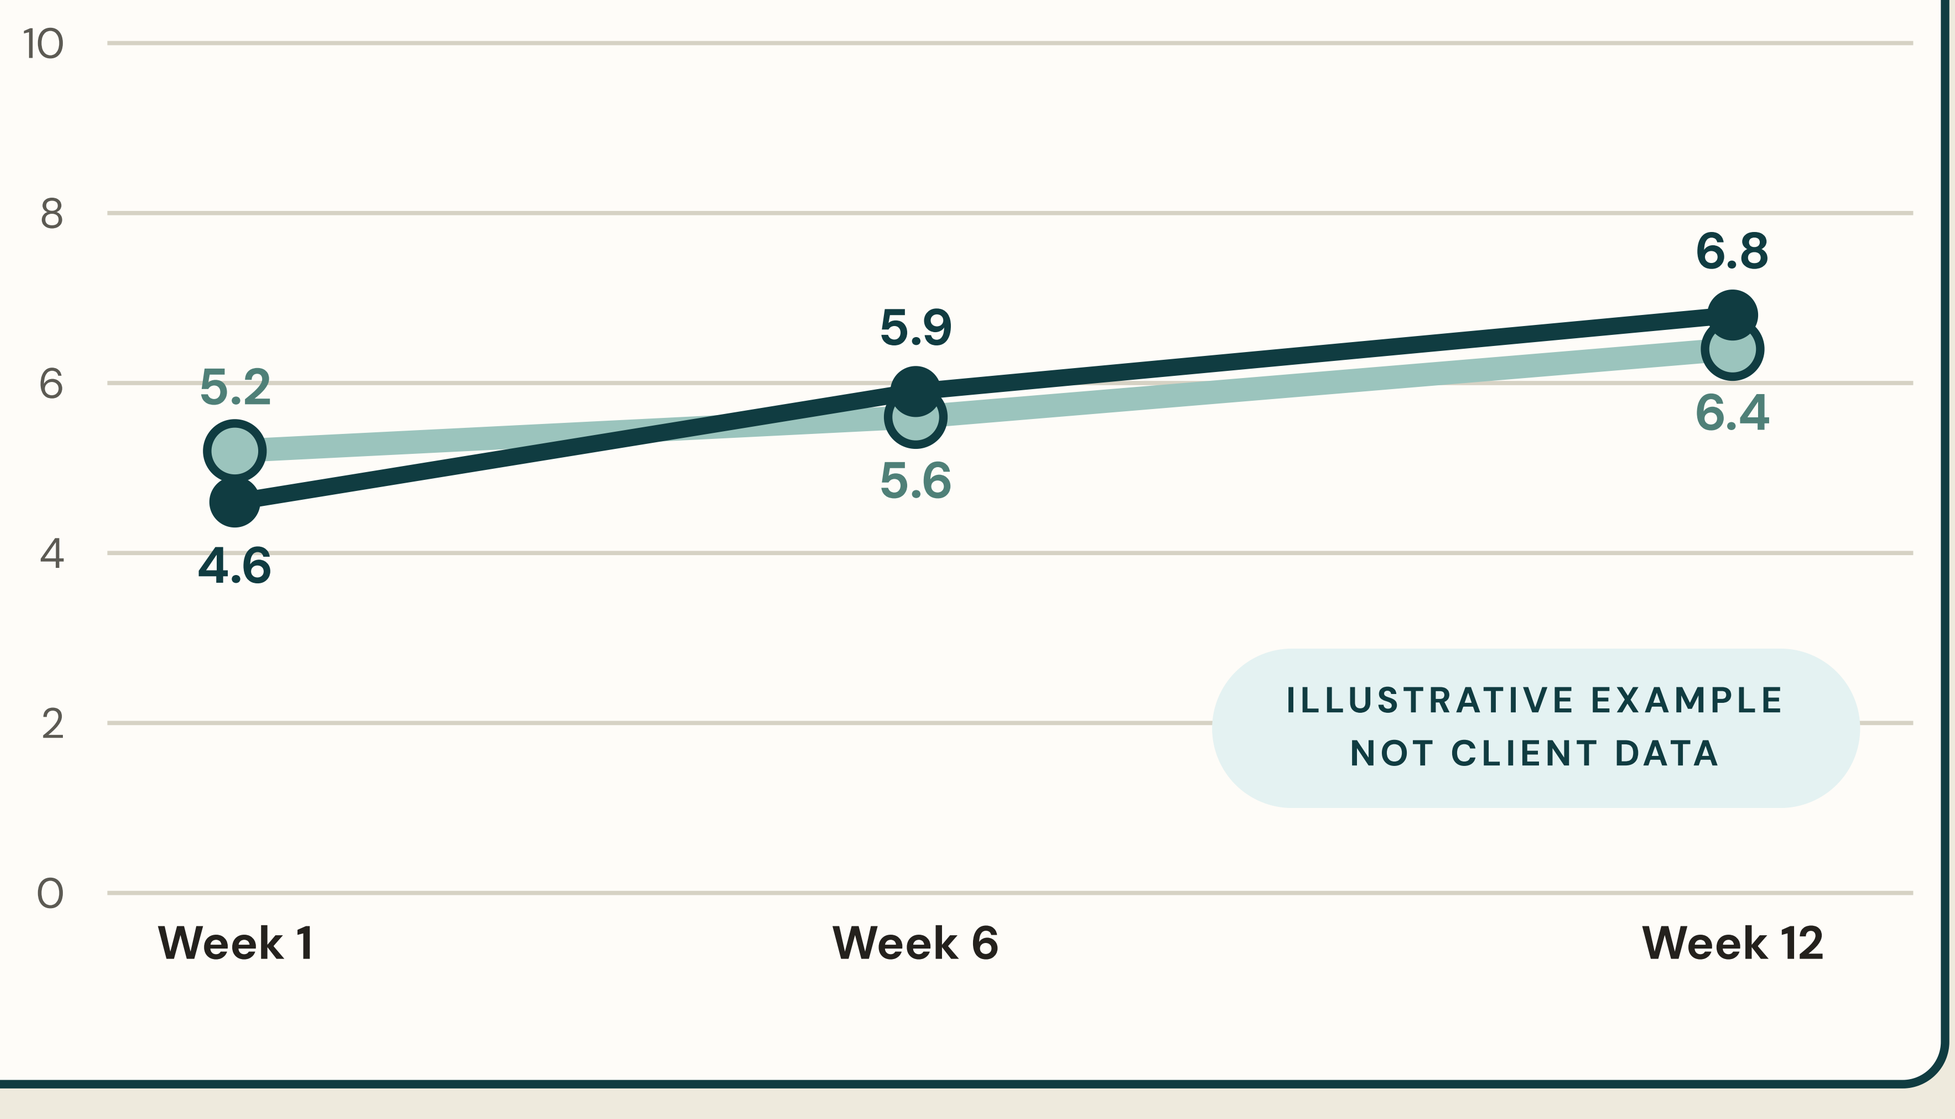

The method taking hold

Is it landing in the body and nervous system? Five capacity measures.

THE EFFECT

How you lead

Is the change showing up in how people lead? Five competency measures.

In the Soma-Q method, capacity comes before outcomes, so those scores often begin to move first. A gain in results without capacity underneath it may be harder to sustain. This is a working expectation of the method, not a research finding, and individuals move differently.
