

Three questions turn a reaction into a choice.

1

Notice

What just got activated?

Meet it with curiosity, not judgment.

2

Locate

Where do I feel it in my body?

Chest, throat, belly, jaw, shoulders, legs.

3

Choose

What helps me stay with myself right now?

Slow exhale, orient, pause, return to the body.

The goal is not to stop the thought. The goal is to recognize the pattern of activation, meet it with curiosity, allow it, and shift.
