SOMA-Q

THE METHOD

Seven areas where body, emotion, and thinking meet.

Each one tied to how you lead.

1 Awareness
Notice the signal early.

2 Regulation
Shift your state in the moment.

3 Organization
Build a steadier baseline.

4 Integration
Lead from it by default.

1 Foundation & Stability

Feel grounded and secure enough to make decisions without bracing for the worst.

2 Creativity & Connection

Think flexibly, generate fresh ideas, and stay connected to the people you lead.

3 Confidence & Drive

Act with steady confidence and hold clear boundaries without pushing yourself into depletion.

4 Compassion & Relationships

Stay open and steady in difficult conversations, so trust holds when the pressure is on.

5 Expression & Communication

Say what needs to be said clearly and calmly, even when the stakes are high.

6 Clarity & Intuition

See a situation clearly and trust your read on it when the information is incomplete.

7 Purpose & Perspective

Keep the larger picture in view, so daily pressure stays connected to what matters most to you.

The Soma-Q Assessment you complete when you begin shows which of these need attention first, so your practice is built for your system, not borrowed from someone else's.

Built on research-supported practices for nervous system regulation.
