SOMA-Q

THE PROOF

Watch your progress in your own numbers.

Scored 0 to 10. Higher always means better.

1 Weekly Check-In

Before every session, a short set of questions, each scored from 0 to 10.

2 Metrics Report

A week-by-week view of how clearly you think, how steady you stay, and how quickly you recover from stress.

3 What happens next

It shows what is shifting and what still needs attention, so practice goes where it counts.

Progress becomes something you can see for yourself, not something you take on faith.
