▲ NERVOUS SYSTEM LITERACY

Stay steady when there is nothing to solve.

You were taught to be the one who figures it out. That is a real strength, and under pressure it can become a loop: the mind keeps working while the body keeps running its alarm.

THE MIND

- ▲ Analyzing
- ▲ Comparing
- ▲ Planning the fix
- ▲ Looking for what is wrong

THE BODY

- ▲ Jaw set
- ▲ Chest tight
- ▲ Gut clenched
- ▲ Shoulders braced

More thinking rarely settles what the body is still running.

A DIFFERENT MOVE

1 Locate it

Where is it in your body?

2 Describe it

Heat, pressure, tightness, buzzing?

3 Settle it

Feet on the floor, one slow exhale.

You still solve the problem. You solve it from steady, not from alarm.
